Software and hardware 2006 news by ARTECH

ARTECH - Smau 2006

(IMMEDIAPRESS) - During SMAU2006 exhibit (Milano-Rho 4-7 October 2007), Pav.8 Row K62, ARTECH presents a complete panorama of new hardware and software solutions in data collection systems:

- New ARGO data collection terminal (patent pending) embedding fast RFID technologies, multistandard, touch-screen, touch-keyboard;
- Fast RFID technology applications for ATTENDANCE, ACCESS control, SECURITY, SHOP-FLOOR and MANUFACTURING control;
- WIRELESS and MOBILE technology applications with real-time bidirectional controls for SHOP-FLOOR and MANUFACTURING data collection;
- New PRESENT software release for attendance and working times, ORACLE® based, for enterprises and Public Administrations;
- New WEB software functions dedicated to ATTENDANCE and working times;
- ACCESS control with "PERSONAL TELEPASS", for people and vehicles tracking, automatic IDENTIFICATION;
- Integrations between data collection and SECURITY, ACCESS control, TRACKING, VIDEO survey;
- Automatic IDENTIFICATION with RFID fast technologies (multistandard)
- New AUTOPRO software release for general-purpose data collection, diagnostics, real-time controls;
- STATISTIC DETECTION system for public (and potential customers) interest level monitoring;
- Hardware and software solutions for SCHOOL and ENTERPRISE MEALS, reservation and payment, catering services;
- CARTA patented system: e-payment, e-pocket, fidelity, monetics;
- Optical data recognition from paper documents by scanner systems;
- Special data collection applications / controls;
- RFID, magnetic, barcode, microchip multistandard badges.

Any ARTECH product is designed and made in Italy.
