ARTECH (SMAU2006 Pav.8 Row K62) presents new ARGO terminal with fast RFID technology : data collection and automatic identification.

ARTECH - Smau 2006

(IMMEDIAPRESS) - ARTECH presents in SMAU2006 (Milano-Rho 4-7 October 2006), Pav.8 Row K62, the new ARGO terminal, equipped with fast RFID technology. ARGO terminal includes multistandard and innovative technologies (patent pending), is actived by a simple finger touch, and allows highest levels (in ergonomy, design, power, flexibility, functions, reliability) for every data collection application:

- Attendance, access control, security;
- Shop-floor and manufacturing control;
- Automatic identification and tracking for people, vehicles, products;
- Security and buildings automation;
- School and enterprise meals, catering services;
- Monetics, fidelity, e-payment CARTA system (patented);
- Other special monitoring systems.

ARGO terminal represents the first milestone for the next generation of data collection terminals.

This product is designed and made in Italy.
