ARTECH in SMAU2006 (Pav.8 Row K62) presents new shop-floor and manufacturing real-time control system with ARGO terminal.

ARTECH - Smau 2006

(IMMEDIAPRESS) - At SMAU2006 (Pav.8 Stand K62) ARTECH presents new dedicated applications in automatic data collection for shop-floor and manufacturing controls. Real-time data validations are guaranteed by last released Autopro software package, and ARGO data collection terminals (patent pending).

Valuable functions and results are offered by the system, i.e.:

Online data and controls on graphic touch-screen;
Operating machines data collection and status survey ;
Automatic identification by fast RFID technologies for working staff;
Products counters detection, machine failures detection;
Integration with operative shop-floor data (orders, notes, etc.)
Comparison of manufacturing times with attendance results.

ARGO terminal (patent pending) represents the first milestone for the next generation of data collection terminals.

This product is designed and made in Italy.
